Dear Mr. Fuller:

Re: RCRA Generator Inspection  
Design and Manufacturing Corporation  
Absocold Corporation  
IND 087032207  
Notice of Compliance (V-287)

Based upon documents available to Solid and Hazardous Waste Management staff during a record review on June 12, 1986, it has been determined that Design and Manufacturing Corporation-Absocold Corporation has achieved compliance with the terms of the Notice of Violation issued on March 17, 1986.

If you have any questions regarding this matter, feel free to contact Mr. Dennis Zawodni of the Office of Solid and Hazardous Waste Management, Department of Environmental Management, at AC 317/232-3407.

Very truly yours,

David D. Lamm  
Assistant Commissioner for  
Solid and Hazardous Waste Management

RE: RCRA Generator Inspection Violation (V-287)

Dear Mr. Zawodni:

Since the inspection of our Richmond D & M and Absocold plant was made on January 23, 1986, Design and Manufacturing has sold these buildings and grounds to Sanyo E & E of Japan. As of the first of March 1986, Sanyo now has complete control of these buildings and grounds. We will be unable to make any changes or corrective action at the Richmond plant.

I would like to respond to the violations listed and actions that were taken, or are being taken, relative to the Connersville plant.

Violation #1: Generator has not determined if the nickel filter sludge from the iron and zinc phosphate tanks is hazardous.

The nickel filter sludge is developed by the replacement of iron with nickel on the ware going through a pickling operation. This sludge is made up of iron and filter aid material. We are sending a sample for lab analysis to determine if this sludge is hazardous.

Violation #2: Manifest do not contain a unique five-digit manifest document number.

This five-digit number was started with our next shipment February 27, 1986. It is understood that the State Board will send us the manifest, that will be numbered, to be used.
